

Installing the FlipShare Software

The Flip camcorder comes with software that can be used for transferring your videos from the camera to your computer. The software is on the camcorder. You will need to install the software the first time you connect the camcorder to a computer.

STEP #1 = Power down the camcorder.

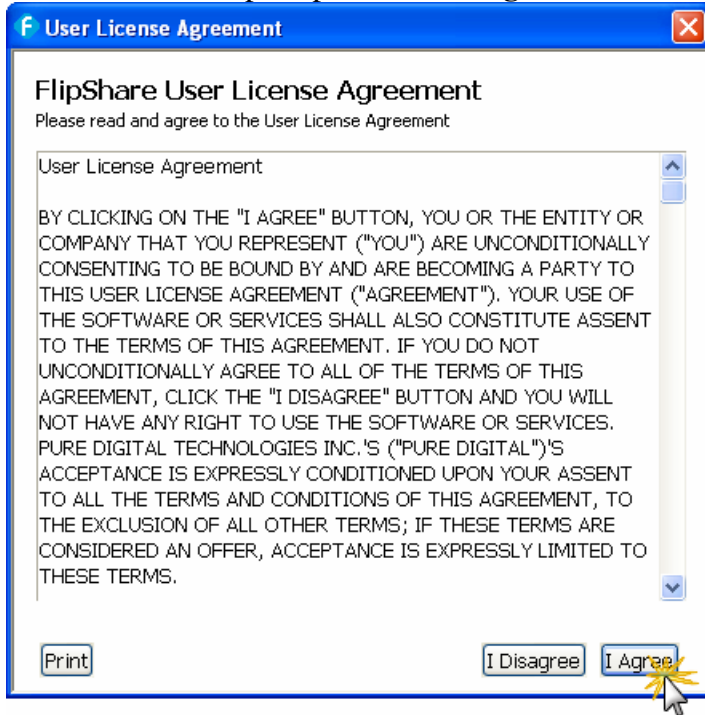

STEP #2 = Connect the camcorder to your computer via the USB arm.

STEP #3 = When prompted, choose the option that reads: **View Your Flip Camcorder Videos Using the Program Provided on the Device** and then click **OK**.

STEP #4 = When prompted, choose **Agree**.

STEP #5 = Wait for the software to install.

STEP #6 = When the installation is complete, the FlipShare software will open, and you will see thumbnails of all of the videos currently on the camcorder.
